

STEF BRACKE

TECHNICAL ARTIST

Ghent, Belgium | stefbracke@hotmail.com | +32 487 15 03 06 | [LinkedIn](#) | [ArtStation](#)

Technical Artist with a Master's in Game Technology and multiple years of production experience in Unreal Engine. Primarily shader development, pipeline tooling, and VFX. Comfortable working across the art-engineering boundary, with a practical, can-do approach to solving technical problems and a genuine interest in helping teams work better. Shipped titles, research projects, and animation pipelines have all shaped a broad and adaptable skill set.

WORK EXPERIENCE

GENERALIST GAME DEVELOPER

September 2025 - April 2026

Aegic Entertainment | Belgium (Remote)

- Contributed across the full development pipeline of We Who Are About To Die, spanning UI design and implementation, gameplay feature development via Unreal Engine Blueprints, 3D modelling and texturing, and quality assurance
- Conducted systematic debugging and QA testing, developing a critical eye for interactive system behaviour and user-facing experience quality

TECHNICAL ARTIST

DAE Research | Kortrijk, Belgium

February 2025 - August 2025

- Developed real-time interactive visualisations of large-scale geospatial data in Unreal Engine, as part of Testerep, an FWO-funded interdisciplinary research project
- Collaborated regularly with researchers from VUB and KU Leuven to translate scientific findings into accessible, interactive public-facing experiences
- Contributed to a project recognised with the KVAB & Jonge Academie Jaarprijs Wetenschapscommunicatie (2025)

PIPELINE TD

Pixel-Nexus | Ghent, Belgium

September 2024 - January 2025

- Designed and implemented automated Python-based pipelines for animation and VFX production, integrating data processing and validation across front-to-backend workflows
- Developed scalable, client-tailored pipeline solutions, reducing errors and streamlining production processes across multiple concurrent projects

TECHNICAL ARTIST

Little Moon Animation | Dublin, Ireland (Remote)

January 2024 - May 2024

- Developed automated tools using Python across Maya, Unreal Engine 5, and Houdini PDG, and integrated the ShotGrid API to enhance project tracking and cross-discipline workflows
- Created and maintained shaders for real-time special effects in Unreal Engine 5 for The Scavengers (2024).

TECHNICAL ARTIST INTERNSHIP

Pow Wow Entertainment | Vienna, Austria

February 2023 - June 2023

- Researched Chaos Physics and Procedural Content Generation in Unreal Engine 5.2 and produced formal technical documentation of findings
- Gained practical experience in C++ within an Unreal Engine production context

EDUCATION

Breda University of Applied Sciences | Breda, The Netherlands

2024 - 2025

Master (MSc) in Game Technology

Thesis Title: *Exploring Rigging Tools in Blender: A UX Perspective*

Howest University of Applied Sciences | Kortrijk, Belgium

2019 - 2023

Bachelor (Ba) of Digital arts and entertainment

Abertay University | Dundee, Scotland

2022 - 2023

BA (Hons) - Semester abroad

TECHNICAL SKILLS

- Unreal Engine 5 - proficient in: Blueprints, Niagara, materials, Editor Utility Widgets, optimisation
- 3D & Content Creation
 - Blender (proficient), Houdini (proficient, incl. PDG), Maya (working knowledge, incl. MEL), 3DS Max (working knowledge), Substance Designer & Painter
- Shaders & Rendering
 - HLSL, real-time VFX, and material pipelines
- Scripting & Pipeline
 - Python, C++ (basic familiarity), ShotGrid / Flow Production Tracking, Perforce, Git, Plastic SCM

LANGUAGES

Dutch - Native

English - C1

French - Basic proficiency

German - Basic proficiency

EXTRACURRICULAR

Study Night Team, Howest University of Applied Sciences (2020–2022)

- Co-organised peer study sessions and workshops to support fellow students in their academic development
- Provided structured feedback on student work
- Selected as a student representative to advise staff responsible for ethics policy, providing a student perspective on ethical matters within the institution
